Lost and Found App(Campus Claim)

Overview of the App:

- The app helps solve the issue of uploading and lost and found on this app, instead of sending regular mails from the NITC mail accounts.
- Anyone finding, a lost item can upload a picture of the item, and their contact details.
- Other users can scroll through the app, and if they find their items, they can contact the person who found it, collect from him and the founder then marks the item as found in the app

Features of the App:

1) Add Lost item:
    a) Add the item name and description
    b) Upload the picture of the item found, and where it was found
    c) Contact details
2) Lost item Found
    a) User can toggle the state of the item from lost to found
    b) The color changes to green, or any ui update
3) Viewing all the items lost
    a) A scrollable list so other users can view all the lost items, the list shows the item name, the description, the image (if uploaded), the contact details of the person who found it

4) Navigation
    a) Navigation between the 2 screens including
        i) Upload lost item screen
        ii) Scrolling and checking other lost items

<u>Bonus Features:</u>

1) Specific category tags, based on most lost things (a wild estimate taken from gmail), and filtering according to the same on the scrolling list app, if specified by the user

<u>Tech Stack Used:</u>

- Flutter (Dart)
- Firebase (Syncing data across users, authentication, Image uploading)
- Cloudinary (API to store image and return a URL which was stored in firebase, to access images of the lost item)
- Figma (UI)
